

How better serve a more mobile workforce

Companies around the world are faced with the challenge of leveraging mobility to meet evolving business needs without sacrificing data protection and cyber security. The bigger challenge comes with finding smart ways to develop well thought-out policies, maximize your investment, engage your workforce and harness the power of the digital workspace across departments. As a mobile IT solutions company, **Tech Orchard** can help your organization do just that.

Maximize the value of your Enterprise Mobility Management solutions with:

- **AirWatch/Workspace ONE Deployment Project Management**
 - o Managing the complete AirWatch/Workspace ONE planning, initiation, implementation and configuration, testing, communication, and user adoption marketing project cycle.
 - o Providing all necessary support documentation, user guides, videos, etc. to ensure success in deploying your EMM (enterprise mobility management) strategy
- **AirWatch/Workspace ONE Deployment and Post-Deployment Configuration/Implementation**
 - o Fine tuning systems settings to integrate with customer infrastructure including:
 - SaaS, SaaS Hybrid or On-Premise installations
 - Integration with Directory Services/LDAP
 - o Managing mobile devices according to company mobile device usage policy for company-owned and BYOD (bring your own device) assets including:
 - Enrollment, policies and profiles
 - Certificate management
 - o Securing email deployment and management
 - o Integrating application management and content management
 - o Creating FAQs for users and day-1 support, as well as training and support documentation for IT support staff
- **Mobile Threat Prevention – Check Point**
 - o Advance mobile threat prevention across devices, applications, and networks.
 - o Highest catch rate, transparent user experience, immediate detection and removal
 - o Real-time visibility and threat intelligence that can be integrated with MDM and EMM solutions.
- **Ongoing Annual Support**
 - o Serving as your AirWatch support “representative” contracted on an annual basis for:
 - Proactive support on all AirWatch tickets and issues
 - Console configuration adjustments as mobility policies and goals change and mature, including annual renewal of required Apple certification
 - Periodic review of your console and policies

Introducing Mobility By Design

In addition to helping you get more from your Enterprise Mobility Management (EMM) and Mobile Threat Prevention (MTP) platforms, Tech Orchard has developed a proprietary four-step process used to ensure every facet of mobility in the organization is understood and addressed, and that a comprehensive, unique mobile IT strategy is implemented efficiently and cost-effectively. With Mobility By Design, we can modify the steps below to meet you where you are and move you forward along your journey to mobile success.

DISCOVER

01 DISCOVER

Step 1: Understand the goals of the organization.

Step 2: Evaluate the role of mobility within the organization.

Step 3: Evaluate the need/opportunity for mobility within the organization.

DESIGN

02 DESIGN

Step 1: Develop or modify Mobile Device Usage Policies (MDUP) for company-owned and BYOD assets.

Step 2: Conduct workflow and dataflow assessment for mobile users and the digital workspace.

Step 3: Identify the hardware, software and applications necessary to enable mobile users.

INITIATE

03 INITIATE

Step 1: Deploy Mobile Device Usage Policies (MDUP).

Step 2: Assist in the deployment of the AirWatch EMM and Check Point MTP platforms based on company requirements and objectives.

Step 3: Support various departments in communicating policies and completing the device enrollment process.

IMPROVE

04 IMPROVE

Step 1: Provide ongoing support for your AirWatch and Check Point platforms after the mobile IT strategy is implemented.

Step 2: Complete an annual health assessment, analyze results and provide recommendations for moving forward.

Step 3: Modify mobile initiatives/support as the organization and technology evolves.

Contact us today to discuss how mobility can work for your business.
